ABOUT THE COLLEGE

Mahatma Education Society was established in 1970, with a mission 'education for all'. It runs 48 educational institutions from KG to PG professional courses at Chembur, Gorai, New Panvel (East), New Panvel (West) and Rasayani. Our Secretary and CEO, Dr. K.M Vasudevan Pillai and Joint Secretary, Dr. Daphne Pillai, with their energetic and persistent strive for excellence; have enabled all institutions to exemplify quality education. According to Dr. Pillai "Our greatest wealth is the students we develop; in their success lies our reward". Pillai's College of Education and Research, New Panvel, started in 2007, offers B.Ed. and M.Ed. courses affiliated to University of Mumbai and is a PCP centre for MA (Edu) of IDOL, Mumbai University. The institution has a conducive environment that caters to the need of the present with a futuristic outlook. The building is designed with a purpose of creating virtual classrooms. Our students are privileged to have access to a technologically viable lecture hall with internet connectivity and well equipped student friendly library with open access system and internet connections. Our mission is "To promote purposive education through globalization of mind with societal insight and using education for value transmission to facilitate the student teachers to perform effectively different roles as a teacher in the present society."

ABOUT THE THEME OF THE SEMINAR Environmental Re-engineering- Forest Resource Management:

The United Nations General Assembly declared 2011 as the International Year of Forests to raise awareness on sustainable management, conservation and sustainable development of all types of forests. Forests are an integral part of global sustainable development. Therefore conservation of forest is certainly a necessity that requires to be addressed as a priority. We need to adopt measures to protect our forests to support life on this planet. We will have to

maintain a sustainable earth for the survival of human beings. A holistic approach is required to be adopted for the protection of the plant kingdom as well as the wildlife. Only then a peaceful and mutually beneficial co-existence of all will be possible. Therefore appropriate orientation, awareness and training are needed for teachers and students in this regard. This seminar aims to integrate cultural values with forest resource management through a harmonious, synchronized and friendly approach so that it enables the achievement of sustainable development at the individual level.

OBJECTIVES OF THE SEMINAR

- ♦ To create awareness about forest resources and their management.
- ♦ To acquire knowledge of greenbelt design to conserve forest resources.
- ♦ To explore various ethno botanical practices to improve and sustain health.
- ♦ To create awareness about the ways of disseminating knowledge of forest management.

CORE AREAS:

Approaches to Greenbelt Design:

The Greenbelt Design means planning and designing solutions to restrict haphazard urban growth, fringe congestion and overspill and to create livable natural green environment in our locality. Various approaches to create greenbelts have helped communities to enjoy fresh air, wood products, better micro-climate, cleaner water, sustained land productivity, improved livelihood and better health. Papers are called on the practicality of creating such green belt designs in our home, institution and community.

Ethno botanical Practices and Healthcare:

Man acquired extensive knowledge on economic, aesthetic and medicinal properties of many plants prevalent in nature. This knowledge was accumulated, enriched and passed on from generation to generation. However the present generation is hardly aware of the

traditional practices of their culture due to disintegration of the joint family system and migration to cities. Thus, there is a dire need to protect and promote the indigenous knowledge based on traditional healthcare. Participants are encouraged to share their expertise in the form of valuable tips, demonstration or case-study as paper presentation.

Education and Forest Management:

Our education system needs to take sustainable initiative and developmental efforts at the grass-root level through the empowerment of student-community. Teachers can play a key role in empowering the students not only by giving information but also sensitizing the students towards forest resource management and bringing about a change in their mind-set and behavior for sustainable development. Papers are invited on strategies that can be used to create awareness, enhance knowledge, and develop skill, appreciation and attitudinal change in the students towards managing the forest resources.

ESSENTIALS FOR PAPER PRESENTATION:

- ♦ The contributors are requested to send the abstract (not more than 250 words) along with the full paper (1500 words) on or before 3rd October, 2011 via e-mail only to pcerseminar@mes.ac.in or bhavna_dave11@yahoo.com
- ♦ Papers by post will not be accepted.
- ♦ Paper should be typed in MS Word
- ♦ Paper size: A4
- ♦ Title of the paper: Bold and centre (Font size: 14)
- ♦ Contributor: Name, institutional address, email ID and mobile no. (On the right corner below title)
- ♦ Alignment: Justified
- ♦ Margin: 1" Top, 1" Bottom, 1.25" Left, 1" Right.
- ♦ Font and font size: Times New Roman (English)-12, Kruti dev/text-14 and title-16 (Marathi/Hindi)
- ♦ Line spacing: 1.5
- ♦ References: APA style
- ♦ All papers will be scrutinized and participants will be notified accordingly.
