#### **ABOUT OUR SOCIETY:**

Mahatma Education Society in 1970, with a mission 'education for all', started the Chembur English High School. The vision and dedication of the Late Mr M.P Pillai coupled with the global outlook, tenacious struggle and undaunted spirit of the secretary and CEO Dr. K.M Vasudevan Pillai and the exuberant, incessant strive for excellence of the joint secretary Dr Daphne Pillai have now expanded the Mahatma Education Society to a vast educational complex at Chembur, Gorai, New Panvel (East), New Panvel (West) and Rasayni. The society now runs 48 educational institutions from K.G to post graduate professional courses. The society has also rendered its infrastructure and expertise to distance education courses through open universities, namely IGNOU, YCMOU and University of Calicut and University of Mumbai. The society has excellent faculty in all disciplines and the latest audio-visual equipments and laboratories. While maintaining a high level of efficiency, the management takes a humanitarian approach in employing sub staff and executes a self-imposed social responsibility by giving employment to local men and women who have no other source of livelihood.

As Dr.Pillai aptly puts it "Our greatest wealth will be the students we develop, in their success lies our reward".

#### **ABOUT THE COLLEGE:**

Pillai's College of Education and Research, New Panvel is a three year old college located adjacent to Mahatma School of Academics and Sports, Khanda colony, New Panvel, in a convenient residential locality and is easily accessible by harbour line and roadways. The institution is blessed with a striking and conducive environment keeping in mind the need of the present with a futuristic outlook. The building is designed with a purpose of creating virtual classrooms. Our students are privileged to have access to a technologically viable lecture hall with internet connectivity. We have a well equipped student friendly

library with open access system and internet connections. Our college offers B.Ed and M.Ed course affiliated to Mumbai University and is a PCP centre for MA (Edu) of IDOL, Mumbai University.

#### **ABOUT THE THEME OF THE SEMINAR:**

Environmental Reengineering is a fundamental rethinking and redesigning of the process/ actions leading to better performance and quality environment.

The Environmental Reengineering is concerned with the environment and management of natural resources. It places special attention on the biological, chemical, and physical reactions in the air, land, and water environments and on improved technology for integrated management systems, including reuse, reduce, recycle and recovery measures.

The emphasis is on creating a pleasant and conducive environment around us by rethinking and reengineering our thoughts, actions and concern for our environment.

#### **CORE AREAS:**

##### **1. Conservation of environmental resources:**

Resources are features of environment that are of value to man in one form or the other. The recognition of the finite resources of the earth and the growing demand for them has led to an appreciation of the need for their careful management which can be in simple words called as the conservation of resources. This involves ascertaining the extent of existing resources, seeking new/alternative ones and making more efficient use of existing resources.

**2. Solid Waste management:** "Waste does not mean wasted". In the ecological system, waste is not rubbish, not even wasted. All wastes from one ecological component is converted, transformed or metamorphosed into forms that other organisms require for survival. The same applies to artificial systems too.

**3. Energy Management:** Energy management is not by chance / incident / accident. It is a mission with a

target. Determined efforts in a planned manner are required by every individual to establish realistic strategies for energy management. The thrust is on reducing the energy consumption in our home/ society/ institutions. It cannot be done single handedly, it needs coordinated effort by team of energy conscious people with a target to be accomplished.

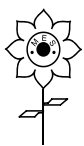

#### **OBJECTIVES OF THE SEMINAR**

1. To create awareness regarding the feasibility of simple and realistic environment oriented actions.
2. To comprehend the need for environmental friendly shift.
3. To analyze our day to day actions with regard to environment.
4. To share realistic environmental practices carried out by the participants

#### **PAPERS INVITED ON PRACTICAL/EXPERIENCED ACTIVITIES ONLY**

Every true environmentalist executes environment friendly action in their own style contributing towards a better and enhanced living. We would like your environmental practices to be presented in the form of Paper/ Demonstration. The paper can be based on your personal actions or a case study on observed activities carried out by other institution/ individual/ society.

1. The process/actions should be environment friendly.
2. The solutions should be realistic and practical to mitigate environmental problems
3. The process should be described in simple language (English/ Marathi/ Hindi), with incurred cost, time and materials required to carry out the same.
4. Two best presentations will be given cash award and certificate.
